The 13th International Conference on Multimedia and Expo (ICME-13) was held in San Jose, California, USA, from July 15-19, 2013. ICME-13 is the premier international conference on multimedia and covers a wide range of topics, including multimedia content creation, processing, management, and delivery. The conference attracts researchers, practitioners, and industry leaders from around the world.

The ICME-13 program featured over 1,000 papers, workshops, tutorials, and special sessions. The papers were organized into 21 tracks, covering a wide range of topics, including:

* Multimedia content creation * Multimedia processing * Multimedia management * Multimedia delivery * Multimedia applications

The conference also featured a number of invited talks from leading researchers in the field of multimedia. The keynote speakers at ICME-13 were:

- * Dr. Ramesh Jain, University of California, Irvine
- * Dr. Shih-Fu Chang, Columbia University
- * Dr. Bernd Girod, Stanford University

Current Themes and Trends

The ICME-13 program highlighted a number of current themes and trends in the field of multimedia. These included:

- * The increasing use of mobile devices for multimedia consumption and creation
- * The growth of social media and its impact on multimedia sharing
- * The development of new technologies for multimedia processing and delivery
- * The increasing use of multimedia in education and healthcare

These trends are shaping the future of multimedia and will continue to drive research and development in the field.

Emerging Technologies

The ICME-13 program also featured a number of emerging technologies that have the potential to revolutionize the field of multimedia. These technologies included:

- * Virtual reality
- * Augmented reality
- * 3D printing
- * Haptic technology

These technologies are still in their early stages of development, but they have the potential to create new and immersive multimedia experiences.

Future Directions

The ICME-13 program provided a glimpse of the future of multimedia. The conference highlighted the current themes and trends in the field, as well as the emerging technologies that have the potential to revolutionize multimedia. The future of multimedia is bright, and ICME-13 provided a glimpse of what the future holds.

ICME-13 was a successful conference that brought together researchers, practitioners, and industry leaders from around the world. The conference provided an overview of the current themes, trends, and research in the field of multimedia. The future of multimedia is bright, and ICME-13 provided a glimpse of what the future holds.
