

# Rookie Goes On North Pole Expedition Following In Admiral Peary's Footsteps

In March of 2023, 23-year-old Emily Snodgrass became the youngest person to ever reach the North Pole on foot. Snodgrass, a rookie adventurer from Minnesota, spent 40 days trekking across the Arctic ice, following in the footsteps of legendary explorer Admiral Robert Peary.

Snodgrass's journey began in Resolute, Canada, where she and her team of four other explorers boarded a plane that took them to the northernmost point of land on Earth, Cape Columbia. From there, they set off on foot, pulling sleds loaded with supplies and equipment. They trekked across the frozen Arctic Ocean, battling through blizzards, sub-zero temperatures, and treacherous ice.

Along the way, Snodgrass and her team faced numerous challenges. They were forced to navigate around open water and icebergs, and they had to contend with polar bears and other wildlife. Snodgrass also suffered from frostbite and other injuries. But she persevered, driven by her determination to reach the North Pole.

After 40 grueling days, Snodgrass and her team finally reached their destination. They stood at the top of the world, at the North Pole. Snodgrass was overcome with emotion as she realized that she had accomplished her dream.

"It was an incredible feeling," Snodgrass said. "I couldn't believe that I had actually made it to the North Pole. It was a life-changing experience."

Snodgrass's expedition was a major accomplishment, and she has inspired many others to pursue their dreams. She is a role model for young people, showing them that anything is possible if they set their minds to it.

In addition to her physical accomplishments, Snodgrass's expedition also had a scientific purpose. She collected data on the Arctic environment, which will help scientists better understand the effects of climate change.

Snodgrass is now back home in Minnesota, but she is already planning her next adventure. She hopes to return to the Arctic someday to continue her research on climate change.

Snodgrass's story is a reminder that anything is possible if you set your mind to it. She is an inspiration to us all.
