The TM 350 Gasproof Shelter was one of the most important pieces of equipment in the American arsenal. These shelters were designed to provide a safe haven for soldiers in the event of a chemical attack. They were able to filter out toxic gases and provide a supply of fresh air for the occupants.

## Design and Features

The TM 350 Gasproof Shelter was a portable, inflatable shelter that could be quickly deployed in the field. It was made of a rubberized fabric that was impervious to gas. The shelter had two compartments: an inner compartment for the occupants and an outer compartment for a filter unit.

The filter unit was responsible for removing toxic gases from the air. It consisted of a series of charcoal filters that absorbed the gases. The filter unit was located in the outer compartment of the shelter, where it could be easily replaced if it became saturated.

The TM 350 Gasproof Shelter could accommodate up to ten soldiers. The shelter was equipped with a variety of features to make it more comfortable for the occupants, including a lighting system, a ventilation system, and a communication system.

### **Deployment and Use**

The TM 350 Gasproof Shelter was used extensively by American soldiers during World War II. It was particularly effective in protecting soldiers from mustard gas, which was one of the most common chemical weapons used by the Germans.

The shelter was typically deployed in areas where there was a high risk of chemical attack. Soldiers would enter the shelter and seal the door behind them. The filter unit would then begin to remove toxic gases from the air. The shelter could provide protection for up to 24 hours.

The TM 350 Gasproof Shelter was a vital tool for American soldiers in World War II. It helped to protect them from the deadly effects of chemical weapons and saved countless lives.

The TM 350 Gasproof Shelter was a remarkable piece of engineering that played a significant role in the Allied victory in World War II. It was a testament to the ingenuity and dedication of the American soldiers who fought in that war.
